Impact of the introduction of HVPQ6 on SIRE 2.0

The assignment of many SIRE 2.0 questions to a compiled vessel inspection questionnaire (CVIQ) is linked to a vessel's HVPQ5.

SIRE 2.0 Question Library: Question Programming Attributes – Version 1.0, provides details of all SIRE 2.0 questions which may be assigned to a CVIQ based on a link to a vessel's HVPQ5 or PIQ.

HVPQ6 is scheduled for release in 2022. The programming within the SIRE 2.0 Question Library database will be updated to accommodate both HVPQ5 and HVPQ6 during the industry transition to HVPQ6.

SIRE 2.0 Question Library: Question Programming Attributes – Version 1.1 will be published in Q3 2022 to provide details of all questions with links to the HVPQ5, HVPQ6 and PIQ.

SIRE 2.0 Question Library feedback portal

To ensure that all SIRE 2.0 participants can provide feedback on the ongoing accuracy of the questions within the SIRE 2.0 Question Library, a feedback portal will be provided to collect and manage comments and suggestions.

Instructions for the feedback portal will be available to download from ocimf.org/programmes/sire-2-0 in Q3 2022. Please do not send in suggestions by email since feedback can only be reliably managed through the feedback portal.
